Teaming Labs Presents:

A TRAIL OF TRUST

A virtual PowerClass about **Teaming Trust**

Intelligent Teaming is about purposefully using the power of teamwork. When team members express their worries and ideas everywhere except during the actual meeting, your ability to team up intelligently is impacted. For teams to thrive, there must be a high level of trust that enables interpersonal risk-taking, making it possible and desirable for all team members to express their concerns, worries, take initiatives, come up with ideas and out-of-the-box solutions, or report their mistakes.

"A Trail of Trust" is a PowerClass that explores what teaming trust is and isn't, how we can recognize it (or lack of it) in our interactions, and most importantly, how can we encourage all team members to take part in building it.

"You'll miss the best things if you keep your eyes shut."

TEAMING LABS

Teaming with Intent, Impact with Purpose

Teaming Labs' PowerClass 'A Trail of Trust', is a virtual PowerClass about teaming trust. During its 120 minutes, you will explore the various components of teaming trust, and connect those aspects to your real-work environment. True to being a PowerClass, you can expect much interaction and playful practice, both in small and large groups. Additionally, you will gain some practical PowerTools that allow you to act without delay in building teaming trust in your very next meeting.

"There's zero correlation between being the best talker and having the best ideas."

Susan Cain

This PowerClass will:

- Create a shared understanding and terminology of teaming trust
- Demonstrate the link between teaming trust & intelligent teaming
- Clarify how teaming trust (and a lack thereof) shows up in team interactions and behaviours
- Introduce you to actionable PowerTools to build teaming trust in your team
