

# T-CANVAS

## A NOVEL WAY TO SEE THE BIG PICTURE

Does your team need help to connect the dots? Do you wish to include a different perspective? Do you want to capture the essence so you can easily share it with others? Teaming Labs presents **T-Canvas** a novel way to shape & bring clarity to your team dialogue - by picturing it!

### 1. Meet & Greet

Our Team Viewer will happily meet with you in person or virtually to discuss the context of your team and clarify your specific needs.

### 2. Do Your Thing

While your team talks, the Team Viewer creates a visual narrative, the so-called Conversation Canvas, illustrating essential aspects of the content, dynamics, and teaming behaviours during your meeting

**“Visualization is daydreaming with a Purpose.”**

**Bo Bennett**

### 3. Picture it!

Voilà! We will share the Conversation T-Canvas (with room for adjustments and additions) with your team. If desired, the Team Viewer will facilitate the after-talk with the team, using the T-Canvas as a starting point for new insights and action points
