

Teaming Missions

Harness the Power of Intelligent Teaming

"The strength of the team is each individual member. The strength of each member is the team."

—Phil Jackson, Chicago Bulls Coach

Unlock Your Teaming Potential

Immerse your team in novel, real-world simulations designed to challenge, engage, and elevate their effectiveness. Whether virtual or in-person, Teaming Missions build trust, foster collaboration, and improve problem-solving under pressure, helping teams thrive in dynamic environments.

Delivered over 2-3 hours, Teaming Missions are ideal for teams of 5-8 members. After each simulation, teams participate in a structured mission retrospective to extract key insights to apply them to their real-world challenges. Intelligent Teaming is the core principle — success relies on how effectively the team works together in leveraging their team intelligence.

TEAMING LABS
Intelligent Teaming

Step Into the Action with Five Immersive Teaming Missions

Take command of a covert submarine mission in the geopolitically tense South China Sea (**Neptune Shield**); defend global markets from an advanced cyber attack against the London Stock Exchange (**Silent Trader**); navigate the intricate balance between environmental stewardship and energy exploration in the Amazon Basin (**Amazonia**); spearhead the response to a dynamic bushfire in South Australia (**Winyu Baway**); or lead a daring Special Operations rescue mission deep in Myanmar's contested territories (**Pegasus Lift**).

What You'll Gain

- **Critical Problem-Solving:** Confront real-world, high stakes challenges aligned to the UN's Sustainable Development Goals.
- **Enhance Decision-Making:** Hone your team's ability to weigh risks, make ethical trade-offs, and act decisively.
- **Intelligent Teaming:** Drive success by building trust, leveraging team strengths and fostering collaboration.
- **Structured Reflection:** Extract actionable insights to strengthen team dynamics and elevate team performance.
